

2010 ROSES IN REVIEW

Phil Schorr • RIR National Coordinator • 12718 St. Lazare Ln. • St. Louis, MO 63127
pschorr@att.net

HELP WANTED: ROSE EVALUATORS NEEDED NOW!

This Roses in Review (RIR) marks the 85th time the members of the American Rose Society have evaluated new rose introductions. The ultimate value of this procedure is realized only when we have a broad base of participation. We need your contribution, whether you grow only one plant of one variety on the list or many of them. We need input from “garden” rosarians as well as exhibitors, and from new rosarians as well as seasoned veterans. We also welcome reports from those who are not yet ARS members, so please pass along copies of this booklet to them or tell them how to access the online survey. The complete results of this survey will be included in the January/February 2011 issue of *American Rose*, and will help determine the ratings in the *ARS Handbook for Selecting Roses*. For these results to be meaningful, we need everyone to participate. So please, take a few minutes of your time to evaluate your new roses. You may use either the form on the following pages (make photocopies if needed) or go to the ARS web site at www.ars.org and complete your report there. Only evaluate roses you grow from the cultivar list.

Our experiment the several years of including a list of older roses has been very successful, although the total reports on them did fall off a little in 2009. As a result we are including another group of 30 older roses at the end of this year's list under “Special Group.” If you grow them, please complete a rating for them. These specific roses will only appear this year, so don't put it off. Please help these fine older roses feel appreciated.

Page 2 of this insert contains some directions for completing your report. **It also contains directions for using the online survey.** Please read the directions closely to learn how the system works. One page also lists all the ARS districts and the name and address of the RIR coordinator for each district. **You should send your completed paper report forms to the coordinator for your district. Please do not send them to me if you live in the U.S., since this only delays the process.**

If you use the forms supplied here, along with any photocopies you might make, the completed forms should be in the hands of your district RIR coordinator no later than Sept. 26, 2010. If you use the computer system through the ARS website (www.ars.org), the same deadline will apply, but your reports will be automatically sent to your coordinator. ***We urge you to give the website system a try — it's fun and easy!*** International rosarians are encouraged to participate and may mail any paper forms to me at the address above. U.S. reporters should send their forms to their district coordinator. Sending them to me just slows down the process. We hope you like this way of handling the reports and will take the time to complete them for all your listed varieties.

The NCNH and Central Districts continue to dominate the district competitions. I am issuing a challenge to all the other ARS districts to see if any of you are ready to defeat the champs and put your district on top. If it happens, I promise some special prizes for the winning districts.

Please participate — we would like to have the benefit of the experience of every rose grower in this evaluation!

HOW TO COMPLETE THE REPORT FORM

Although the form for submitting your evaluations should be largely self-explanatory, a few words of guidance may be in order for the less experienced rater. The following will walk you through the form and help in explaining what is desired in each section. Note especially the new items shown in bold face.

- Cultivar and Class — Write the name of the rose and show the class (e.g. HT, Min, Gr, Special, etc.). Be sure to keep all varieties of a given class together and list them alphabetically before moving on to the next class.
- No. of Plants — Enter the number of plants of this variety that you grow and used in your evaluation.
- No. of Years — Enter the number of years you have grown this cultivar. Count the year planted as the first year unless planted in the fall.
- Garden Rating/Exhibition Rating — These should be evaluated using the numerical rating system explained below. First determine which range best describes the performance of the rose, and then choose any score within that range (e.g. 7.4 or 7.7) to fine tune the result. A description of the factors to consider is given below. Please don't be hesitant to use high ratings for the best varieties and low ratings for the disappointing ones. We should end up with at least 4 or 5 cultivars with ratings above 8.5. If your plant of a given variety is doing poorly, but you have seen it doing well elsewhere and you have reason to believe you received a bad plant, do not penalize the rose in your rating. It is better to just leave it out or rate it based upon performance you have seen in other gardens. Further, ratings below 5.0 should only be used in very unusual cases since they seriously skew the results.
- Winter Hardy — Simply check "Yes", "Borderline" or "No." If this is a new cultivar that has not yet experienced a winter, or your climate is such that winter hardiness is not an issue, check "Don't Know."
- Height — Indicate whether the cultivar grows tall, medium or short for its type. For instance, a hybrid tea between 2 and 3 feet tall would likely be marked "Short," while a miniature of the same height would be "Tall."
- Mildew-Blackspot-Rust — Place a check opposite the appropriate level of disease in each of the columns. If you live in an area that does not experience Rust, for example, leave it blank.
- Fragrance — Place a check opposite the correct level.

The section under the rating block is an opportunity for you to record what you particularly like or dislike about the cultivar. This is extremely useful information for your district coordinator when compiling a consensus. Please take a moment to list the things you find uniquely satisfying or frustrating about the rose.

When determining the "Garden" rating, you should consider such items as the vigor and growth habit of the plant, the number of blooms and how quickly it repeats, the beauty and lasting quality of the blooms in the garden, fragrance, disease resistance, winter hardiness, quality of the foliage, and so forth. Exhibition performance should not be considered here.

When determining the "Exhibition" rating, you should consider the form of the bloom (or spray where appropriate), its lasting quality, substance, color, stem and foliage, and all the other attributes that make for a successful exhibition cultivar. This would also include the ability to bloom at show time. However, do not take into account the ability of a hybrid tea, for instance, to do well in the "Open Bloom" class. Only consider the primary competition class for each type.

If you still aren't sure how to evaluate your rose after all this, consider how it does versus an older rose you do grow. For instance, 'Mister Lincoln' has a rating of 8.3. Is the hybrid tea you are rating better than 'Mister Lincoln'? If so, your rating should probably be higher than 8.3. Does your floribunda do worse than 'Angel Face'? Then it's rating should be lower than 7.7.

A note about the online survey form: Some reporters have told us they are never sure whether their reports have gone through when using the online survey. **Here are two important things to remember:** First, when you have the report for a particular variety filled in, be sure to click on "Save" at the bottom of the page. **That is the action that sends your report to our server.** If you aren't sure all your reports went through, click on the link in the upper right corner of the report page that says "List Your Reviews." This will bring up a list of all the reviews you have successfully submitted. Finally, be sure to read the "Instructions" page before beginning your reports. There are often small changes in the system that you will miss if you don't read the instructions first. Give the online system a try. It really is fun and easy to use.

SCORING SCALE

| | |
|------------|---|
| 9.3 to 10 | One of the best roses ever. Scores in this range should be awarded sparingly. |
| 8.8 to 9.2 | An outstanding rose. One with major positive features and only minor negatives. The top 1%. |
| 8.3 to 8.7 | A very good to excellent rose. One you would recommend without hesitation to anyone. |
| 7.8 to 8.2 | A solid to very good rose. Its good features easily outweigh any problems. |
| 7.3 to 7.7 | A good rose. A little to somewhat above average. |
| 6.8 to 7.2 | An average rose. |
| 6.1 to 6.7 | A below average rose. |
| 0.0 to 6.0 | Not recommended. |

ROSES IN REVIEW RATING EVALUATION SHEET

Please use this evaluation form for rating your roses unless you are using the web site approach. You may photocopy this page. **COMPLETED FORMS SHOULD BE IN THE HANDS OF YOUR DISTRICT RIR COORDINATOR BY SEPT. 26, 2010.** Only international reports should be sent to the National RIR Coordinator: Phil Schorr, 12718 St. Lazare Ln., St. Louis, MO 63127. Please fill out the forms as completely as possible, including any comments that will help us understand the performance of the roses.

**IMPORTANT: LIST ALL VARIETIES IN THE ORDER THEY APPEAR ON THE FOLLOWING PAGES.
FIRST SORT BY CLASS, THEN ALPHABETICALLY WITHIN EACH CLASS.**

Name and Address: _____

E-mail: _____ Do you spray regularly? _____ Do you exhibit? _____

List unusual conditions, if any _____ Local Rose Society _____
